Hubbard, Lawson excel in tournament

Robert Hubbard captured the men's singles championship at the Hardee's YMCA High School Tennis Tournament held on June 12, 13, and 14 in Altavista.

In the singles, Hubbard, the son of Mrs. Mildred Hubbard and the late William Hubbard of Appomattox, demonstrated the best forehand topspin in the tournament and the number one player for Appomattox County High School survived a close match with Albermarle High School's Montie Pace on Friday.

In the Men's Doubles, Freddy Lawson, the son of Mr. and Mrs. Freddy Lawson of Appomattox, teamed up with Hubbard and they came up winners. It took three sets for Lawson and Hubbard to defeat Finch and Bond of Gretna but they finally won 7-5 in the final set.

Lawson and Hubbard, the top seeded doubles combination and number one doubles team at Appomattox County High School this year teamed up for a well-rounded game.

Lawson was a consistent player along the baseline, setting Hubbard up at the net for a strong volley game and overhead putaways.

Act now to prevent canine parvovirus

Since its sudden appearance in the summer of 1978, canine parvovirus (CPV) infection has been a subject of grave concern for pet owners, breeders and veterinarians.

The highly contagious disease attacks the intestinal tract, white blood cells, and in some cases the heart muscle.

The first signs of CPV, usually vomiting, lethargy, loss of appetite and severe diarrhea, will most often appear 5-7 days after the dog is exposed to the virus. Death may follow immediately after the first signs or may occur within a period of several days due to dehydration.

The heart disease syndrome can occur without the intestinal form though it may appear 3-6 weeks after a dog has apparently recovered. Approximately 75% of pups less than 5 months old and 2-3% of older dogs die from the disease.

The source of the infection is fecal waste and vomitus from infected dogs. Large amounts of virus may be present in the fecal matter and is resistent to extremes in environmental conditions. It is readily transmitted from place to place on the hair or feet of infected dogs or by contaminated cages, shoes, or other objects. CPV cannot be transmitted to other types of animals or people.

Because the appearance was both sudden and widespread, researchers and veterinarians were forced to reply on less than perfect control measures. Feline distemper vaccines were first used to provide **short term** immunization. Fortunately a new canine origin inactivated vaccine has now been developed to provide long term protection.

Initial vaccinations consist of 2 doses given 3-4 weeks apart. Diamond Hill Animal Hospital, located at 1400 Main Street in Lynchburg, will be offering these vaccines at our clinic at the reduced fee of $6.00, in an attempt to quell this outbreak. This fee will be in effect on Friday, June 26, from 9 a.m. until 5 p.m. and again on Saturday, June 27, between 9 and 1. For further information please call 845-1242.

Fleshman gets degree

Twenty-two students from the Lynchburg area have been awarded an associate degree from Ferrum College. Among them was Willis Fleshman, son of Mr. and Mrs. Willis Fleshman of Appomattox.

The degree was presented by Ferrum College President Joseph T. Hart during May commencement ceremonies. Attorney General of Virginia J. Marshall Coleman presented the commencement address.

Revival scheduled

Revival services will begin at the Trinity United Methodist Church, Concord, on June 28 and continue through July 3.

The Rev. F. J. Wingfield, Jr., will be the guest minister for the services beginning each evening at 8:00. Special music will be a part of each service.

The Rev. David B. Camden, pastor of the church, extends a cordial invitation to the public to attend the services.
